

James (Jim) Craig**Lockheed Martin Mission Systems and Training**

Jim is the Director of Business Integration at Lockheed Martin Mission Systems and Training. Employing over 17,000 people in the United States and internationally, Mission Systems and Training develops and sustains complex surface, air, and undersea systems for military, security, and civil markets around the world. In addition to the systems we produce, we ensure mission readiness through our training and logistics products and services.

Prior to this assignment, Jim held positions at Lockheed Martin's Global Training and Logistics business unit as Vice President of Operations and Vice President of Training Systems. Jim was also Vice President of International Programs for Lockheed Martin Air Traffic Management, where he was responsible for programs in Europe, Asia, and South America.

Jim began his career as a software engineer with IBM Federal Systems, where he held various engineering and management positions for complex, real-time system development programs around the world.

A graduate of the Georgia Institute of Technology, Jim has a Bachelor of Science degree in information and computer science. He serves on the boards of directors for the National Center for Simulation and the Central Florida Cystic Fibrosis Foundation. He is a member of the Association for Computing Machinery, the Institute of Electrical and Electronics Engineers, the National Training Systems Association, the Association of the United States Army, and the National Defense Industrial Association. Jim is married to Lisa Craig, a system engineer at Lockheed Martin. They have three daughters, Emma, Jamie, and Charlotte.
